### **EMPLOYMENT HISTORY**

**Geoffrey Hunt & Partners** | Consulting Engineers & Scientists  
Associate | 2012 to present

Consulting Forensic Engineer specialising in the investigation of electrical faults and failures; fire and explosion investigation with particular expertise in fires of electrical origin.

#### **Across Continents**

Around-the-world bicycle expedition | 2009 to 2012

Cycled solo around the world, promoting the work of The Outward Bound Trust.

#### **Royal Navy**

Engineering Officer | Retired with rank of Lieutenant Commander | 1987 to 2009

Accomplished in directing and conducting technical investigations into safety, equipment and procedural failure related incidents on warships, and liaison with relevant authorities to avoid repetition. Skilled in independent assessments of major warship computer and weapon systems, and the provision of pragmatic advice on fitness for purpose.

Specialist analytical skills in resolving disparate and frequently contradictory physical, written and oral evidence. Considerable experience of liaison with UK and overseas Government departments and agencies, including the UK scientific community, in support of complex investigations.

Extensive experience of technical report writing, delivering talks and presentations, Board level briefings and media interviews.
